How to make a purchase in the pension fund

By buying into the pension fund, you can simultaneously increase your retirement benefits, close any contribution gaps and reduce your tax burden. In addition, you benefit from the interest earned on your capital.

1.

Determine your purchase amount

On your pension certificate, you will find your purchasing potential, i. e. the maximum amount you can pay in.

2. 🛕

Please check whether the following applies to you:

You made an early withdrawal of pension savings to fund the purchase of residential property.

You were self-employed and paid into pillar 3a during this period.

You moved here from another country.

You have entitlements from a vested benefits account.

If any of these points applies, your purchasing potential could be less than stated on your pension certificate. Please make the appropriate entries under point 3 of the form and enclose the necessary supporting documents. We will contact you if your purchasing potential is less than the desired purchase amount.

You would like to receive benefits in the form of a lump sum over the next three years.

If you have made a purchase, you may not claim any benefits in the form of a lump sum in the next three years.

You had to surrender part of your pension savings to your former spouse following a divorce.

In this case, you can make up for this shortfall

of retirement provision at any time and without any restrictions by making a purchase.

Please note that the tax authorities might not recognize, or at least might not fully recognize, the purchase for purposes of a tax deduction. For information on tax matters please contact your tax authority before making a purchase.
